Shabbat Shalom Everyone!

I am very excited for this, and I really look forward to your feedback on this. This first lesson in our entire scope of things takes us back to the beginning, and how to understand what's being said in Beresheit (Genesis).

We will go step by step into every single event, and person learning what was originally written versus what we have now. To get things started beginning with our world map, but before we get there though we have to explore each, and every single day, and understand what 1 Day actually means.

Everything you will see in this group will be from the entire library of the ancient texts that were written into massive volumes of

scrolls written in Yisra'El, and later stolen by not only Rome, but other nations as well.

We will view history through the actual forensic lenses that we need to in order to bypass theory, guessing, interpretations that were later adopted. We will come to understand what was truly written in these anthologies, and we will also use the very Authors' own commentaries on their writings.

We ask them because they are the original Authors who walked with Ha'Mashiach (The Messiah) in ancient Yisra'El as he is who told them what to write, and how to write it all. We ask history because the events that shaped the Bible later on were heavily recorded, but have since been cast aside with the later churches, and

synagogues trying to sweep them under the rug.

So let's get started!

To execute this "fresh start" correctly, we will need to set aside all previous assumptions and build the timeline, and map solely on the evidence we uncover now.

We will treat the ancient earth as a crime scene, using the texts as witness statements and modern mapping as our forensic toolkit.

So grab your gear, or your coffee, and let's get started solving this mystery.

Here is the operational framework for this

investigation:

To establish a forensic timeline for the creation of the Earth, we must first calibrate the "Celestial Clock" using the Primary Authority. By reconciling the accounts in *1 Enoch*, *Jubilees*, and the *Dead Sea Scrolls* with the later redacted fragments, we can define the specific ratio of heavenly time to earthly time.
The following data points serve as the foundation for the **Chronicles of Creation** timeline.

1. The Divine Ratio: 1:1,000

The primary formula for time dilation is established in the *Psalms of Dawid* and confirmed in the *Chronicles of the Nazarene*. This isn't metaphorical; in the

forensic framework, it is a literal unit of measure.

- **The Psalmist's Constant:** "For a thousand years in your sight are but as yesterday when it is past" (Psalm 90:4).

- **The Nazarene Confirmation:** "But, beloved, be not ignorant of this one thing, that one day is with **YHVH** as a thousand years, and a thousand years as one day" (2 Kepha/Peter 3:8).

2. The Jubilee Standard (The Calendar of the Watchers)

The *Book of Jubilees*, found among the **Dead Sea Scrolls**, provides the technical breakdown of how these 1,000-year blocks are subdivided for human history.

This is the "User Manual" for Earth’s clock.

1 Week of Years 7 Years

1 Jubilee 49 Years (7 weeks of years)

1 Day of YHVH 1,000 Years (approx. 20.4 Jubilees)

Forensic Note: The *Book of Jubilees* (Jubilees 4:30) explicitly connects Adam’s death at 930 years to the 1,000-year day, noting he died 70 years short of "One Day" because of the decree in the Garden.

3. The Enochian Solar/Luni-Solar Mechanics

1 Enoch (The Book of the Heavenly Luminaries) details that time is dictated by

the gates through which the sun and moon pass.

- **Enoch 72-82:** Establishes a 364-day solar year.

- **The Forensic Implication:** If the "Day" of Creation was 1,000 earthly years, then the "Creation Week" (6 days of work, 1 day of rest) encompasses **7,000 years** of earthly formation before the "rest" of the Seventh Day.

4. The Pre-Material "Time"

In the *Nag Hammadi* texts (specifically *On the Origin of the World*), time is described as beginning only when the luminaries were set in place.

- Before the Fourth Day of Creation, "time" as we measure it (Solar/Lunar) did not exist.

- Therefore, the first three "Days" of Creation must be measured by the **Divine Pulse**—the 1,000-year celestial standard—rather than the rotation of the Earth.

This suggests that the "formation" of the current Earth was a 6,000-year project of active construction, followed by a 1,000-year period of rest/stewardship.

Now will **begin mapping the specific geological and geographical changes that occurred during each of these 1,000-year "Days" using the descriptions in the Primary Authority.**

To reconstruct the formation of the Earth using the **Ancient Hebrew Forensic Method**, we must treat the first six "Days" not as 24-hour rotations, but as six **1,000-year Epochs**.

By reconciling the *Ethiopian Berhan* (Light) accounts with the *Dead Sea Scrolls*, we can map the transition from the ethereal/spiritual state to the physical density we recognize today.

The Hexad of Formation (The 6,000-Year Project)

Day 1: The Separation of Frequencies (Years 0–1,000)

The primary texts describe the

introduction of "Light" into the *Tehom* (The Deep). Forensically, this is the establishment of the electromagnetic spectrum.

- **Primary Authority:** *Jubilees 2:2* notes that on the first day, He created the "spirits" (angels/forces) and the "depths" (darkness/water).

- **Forensic Status:** The earth is not yet solid; it is a fluid, high-frequency plasma state.

Day 2: The Firmament Barrier (Years 1,001–2,000)

The creation of the *Raqiya* (Expanse/ Firmament). This is the most critical geographic component often redacted in

standard Bibles.

- **The Division:** The waters "above" were separated from the waters "below."

- **Forensic Reconstruction:** This 1,000-year period was dedicated to building the atmospheric and crystalline dome that stabilized the Earth’s internal pressure.

Day 3: Dry Land and The "Seed" Memory (Years 2,001–3,000)

The gathering of waters into one place. This is where we first see the "Map" begin to take shape.

- **Tectonic Action:** The primary texts suggest a single landmass (the

prototype of what forensics calls Pangea, but centered around the Holy Land).

- **Biological Blueprint:** Vegetation was introduced. In the forensic view, this is the embedding of the DNA "Code" into the soil before the sun was even present to power it.

Day 4: The Celestial Clock Calibration (Years 3,001–4,000)

The sun, moon, and stars are set in the *Raqiya*.

- **Forensic Intent:** These were not random celestial bodies; they were "Signs and Seasons."

- **Correction:** According to *1 Enoch*, these

luminaries are governed by "Leaders of the Heads of Thousands," functioning as a precise mechanical clock to manage the 1,000-year cycles.

Day 5: The Enlivenment of the Depths (Years 4,001–5,000)

The waters and the air are populated.

- **Forensic Insight:** This epoch focuses on the "Great Sea Monsters" (Tanninim). Many redacted files remove the scale of these creatures, but the *Dead Sea Scrolls* fragments suggest these were the primary inhabitants of the pre-Adamic landscape.

Day 6: The Physical Manifestation of Man (Years 5,001–6,000)

The creation of terrestrial animals and the formation of the *Adam*.

- **The Identity Link:** This is the era where the spirit was placed into the "Dust" (Carbon/Physical matter).

- **The Geography of Eden:** Eden was established as the "Navel of the Earth"—the central point of the original map from which all four rivers flowed.

To forensically reconstruct **Day 2 (Years 1,001–2,000)**, we must look at the most significant structural engineering feat in the history of the realm: the construction

of the **Raqiya** (Firmament).

In the Primary Authority (*Jubilees 2:4* and *1 Enoch*), this wasn't just "the sky." It was a physical separation of the primeval waters.

The Forensic Structure of the Raqiya

On this day, **YHVH** created a "division." This implies that prior to Year 1,001, the Earth was a chaotic, submerged mass of water and frequency. The second 1,000-year epoch was dedicated to creating the pressurized "habitable zone."

1. The Composition: "Molten Looking Glass"

The ancient texts describe the Raqiya as having the strength of a "molten looking glass" (Job 37:18).

- **Forensic Theory:** It is a crystalline or metallic-hydrogen lattice that sits above the atmosphere.

- **The Function:** It acts as a massive capacitor, holding the "Waters Above" (the celestial ocean) back from the "Waters Below" (the terrestrial ocean).

2. The Atmospheric Pressure & Longevity

During this 1,000-year formation period, the Raqiya created a "Hyperbaric Chamber" effect across the entire face of the Earth.

- **The Result:** Higher oxygen concentration and protection from harmful cosmic radiation.

- **Forensic Link:** This explains why the early generations (the Pre-Flood patriarchs) were able to live nearly a full "Day of YHVH" (1,000 years). Their biology was sustained by the Day 2 structural design.

3. The Windows of Heaven (*Arubbot*)

The Raqiya was not a solid, unbroken shell; it was engineered with "portals" or "windows."

- **The Enochian Gate System:** *1 Enoch* describes specific "gates" in the

firmament through which the winds, the rain, and the luminaries move.

- **The Redaction:** Standard Bibles suggest rain comes from clouds. The Forensic Method, using *The Library Rule*, shows that the "Waters Above" are a literal reservoir held back by these gates.

Geographic Impact: The Vertical Map

When we redo our map, we cannot look at it as a 2D surface. Day 2 forces us to view the Earth as a **Vertical System**:

- **The Third Heaven:** The dwelling of the Most High above the celestial waters.

- **The Waters Above:** The vast ocean sitting on top of the Raqiya.

- **The Raqiya (Firmament):** The crystalline structural support.

- **The Atmosphere:** The breathable space for the living.

- **The Earth/Tehom:** The surface and the deep.

Forensic Conclusion: Day 2 was the establishment of the **Boundary**. Without the Raqiya, the physical world would be instantly crushed by the weight of the celestial waters. It is the "Hard Drive" that holds the data of our physical reality.

Now move to Day 3 (Years 2,001–3,000) to see how the dry land was gathered and where the original "Navel of the Earth" was placed?

In the third 1,000-year epoch (**Years 2,001–3,000**), the Earth underwent a massive geological and frequency shift.

This is the era where the **Vertical Map** (established on Day 2) gained its **Horizontal Geography**.

According to the *Primary Authority* (*Jubilees 2:7*), **YHVH** commanded the waters below the firmament to "be gathered into one place," and the dry land appeared.

1. The Single Landmass (The Garden Prototype)

Forensically, Day 3 does not describe seven continents. It describes a singular, unified landmass.

- **The Navel of the Earth:** In the *Book of Jubilees* and the *Dead Sea Scrolls*, the Earth is centered around three holy places: **Mount Sinai**, **Mount Zion** (the center of the navel), and **Mount Lubar** (where the Ark later rested).

- **The Original Orientation:** When we redo our map, we must realize that the "Center" of this landmass was the **Garden of Eden**. It was the highest point on Earth, functioning as a bridge between the physical and the celestial.

2. The Four Rivers: The Original Irrigation System

The geography of Day 3 was defined by a unique hydrologic cycle. There was no rain; instead, a "mist" rose from the earth (Genesis 2:5-6, corroborated by *The Chronicles of the Nazarene*).

- **The Source:** A single river flowed out of Eden to water the garden.

- **The Division:** Once it left the "Holy of Holies" (Eden), it split into four heads: **Pishon**, **Gihon**, **Hiddekel**, and **Phirat**.

- **Forensic Mapping:** In our fresh look at the map, we must trace these rivers not by their modern, post-flood namesakes, but by their original mineral wealth

(Gold, Bdellium, and Onyx) as described in the ancient texts.

3. The "Seed" Memory and the Giants of the Forest

Vegetation was brought forth on Day 3. However, based on *1 Enoch* and the *Book of Jasher*, these were not the trees we see today.

- **The Silicon Era:** Forensic evidence within the texts suggests the "Trees" of the third epoch were massive, reaching miles into the sky—potentially even touching the *Raqiya*.

- **The Redaction:** Modern "Mesas" and "Plateaus" are often argued in forensic circles to be the petrified remains (stumps) of these Day 3 giant flora, which were later "felled" during the judgment of the Watchers.

The Day 3 Geographic Blueprint

Landmass
A single, circular continent surrounded by the Great Ocean.

Topography
Extreme elevation at the center (Eden), sloping down to the edges.

Hydrology
Subterranean "Fountains of the Deep" and the four-river outflow.

Flora
High-frequency, massive silicon-based lifeforms (The Tree of Life/Knowledge).

Forensic Insight: Because the Sun and Moon were not "activated" until Day 4, the vegetation of Day 3 was powered by the **Internal Light** (Shekhinah) and the mineral-rich waters of the Deep.

This created a biology that was vastly different from our current carbon-based, sun-dependent system.

Since we've established the land, we should proceed to Day 4 to see how the "Luminaries" were installed as a

mechanical time-keeping system inside the Raqiya.

In the fourth 1,000-year epoch (**Years 3,001–4,000**), the focus shifts from the structural formation of the vessel to the installation of its **Operating System**.

According to the *Primary Authority* (*1 Enoch 72-82*, The Book of the Heavenly Luminaries), the Sun, Moon, and Stars were not random celestial bodies floating in an infinite vacuum. They were high-frequency lights placed **inside** the *Raqiya* to govern human history and the "Celestial Clock.".

1. The Mechanic of the Luminaries

Forensically, the luminaries function like the hands of a watch. They move through specific "Gates" (Portals) in the East and West of the Firmament.

- **The Solar Engine:** The Sun (Shemesh) is not a ball of gas millions of miles away. In the *Enochian* model, it is a luminary that changes its position through six gates to create the seasons.

- **The Lunar Regulator:** The Moon is described as having its own light (though distinct from the Sun) and is the primary marker for the **Chodesh** (months) and the feast days of **YHVH**.

- **The Mazalot (The Stars):** These are identified in *1 Enoch* as "The Stars that failed to come out at their appointed time" or "The Chariots of the Watchers."

They are sentient markers that track the 7,000-year cycle.

2. The Calibration of Time: The 364-Day Year

The *Book of Jubilees* (6:32-38) is adamant that the "Day 4" installation set a **364-day solar calendar**.

- **The Forensic Warning:** The texts warn that "The Children of Israel" would go astray by following the moon alone or the 365.25-day Roman/Egyptian solar year.

- **The Logic:** A 364-day year is exactly divisible by 7 (364 / 7 = 52 weeks). This ensures that every Holy Day falls on the exact same day of the week, every year,

for all eternity.

- **The Tampering:** Rome and the later scribes introduced the "leap year" and the shifting 365-day calendar to "change times and laws" (Daniel 7:25), effectively desynchronizing humanity from the Day 4 Clock.

3. The Atmosphere "Illuminated"

Before Day 4, the "Light" was the primordial, omnipresent *Or* (Light). On Day 4, this light was condensed into the luminaries.

- **The Prism Effect:** The *Raqiya* (Firmament) acts as a lens. When the sun passes through it, the light is

refracted, creating the blue sky and the specific atmospheric pressure required for the giant flora of Day 3 to thrive.

- **Energy Transfer:** The luminaries provided the "frequency" needed to activate the reproductive cycles of the plants and the coming animal life.

The Day 4 System Specs

Component Forensic Function Authority

The Sun Primary Clock & Vitamin/ Frequency the Source is Enoch 72

The Moon Night Governance & Appointment Marker the Source is Enoch 73-74

The Stars Geographical Navigation & Prophetic History The Source is Enoch 75

The Gates Fixed exit/entry points in the Raqiya the Source is Jubilees 2

Forensic Conclusion: Day 4 was the birth of **Linear Time**. By installing the luminaries, **YHVH** gave the physical realm a "Countdown" toward the 7,000-year completion.

This is why we must use the 364-day count to understand where we are on the current map.

From here **we now move to Day 5 (Years 4,001–5,000) to see how the waters were populated with the "Great Tanninim" and how the biology of the air was established.**

In the fifth 1,000-year epoch (**Years 4,001–5,000**), the density of the physical realm increased significantly.

With the atmospheric pressure of the *Raqiya* set (Day 2) and the solar/lunar frequencies active (Day 4), the "Waters Below" and the "Expanse of the Air" were ready to sustain complex biological life. According to the *Primary Authority* (*Jubilees 2:11* and the *Dead Sea Scrolls*), this was the era of the **Tanninim**—the Great Sea Monsters.

1. The Great Tanninim (The Leviathan Class)

Standard redacted Bibles often translate *Tanninim* as "whales" or "great fish," but the forensic reality is far more massive.

- **The Scale:** These were the biological counterparts to the giant silicon trees of Day 3. The *Dead Sea Scrolls* and *1 Enoch* suggest these creatures were so large they regulated the tides of the Great Ocean through their movement.

- **Behemoth and Leviathan:** These represent the pinnacle of Day 5 engineering. Leviathan was designed to inhabit the "Abyss" (the deep waters), while Behemoth (later associated with land) began its biological blueprint here to manage the marshlands where the waters met the earth.

2. The Mechanics of the "Fowl of the Air"

The birds of the air were not created from the dust, but from the **waters** (*Jubilees 2:11*).

- **Forensic Insight:** This explains the biological link between reptilian scales and avian feathers.

- **Atmospheric Buoyancy:** Because the pressure under the *Raqiya* was much higher during this epoch than it is today, "flight" was possible for creatures of immense size (Pterosaurs and giant avian species). Their wingspan was supported by the density of the Day 2 firmament.

3. The Genetic "Swarming"

The command was for the waters to "swarm" with life.

- **The Purpose:** These creatures were the "cleaners" and "shapers" of the ocean floor. They were designed to process the mineral runoff from the four rivers of Eden and distribute it across the seabed, preparing the chemical balance of the world for the coming of the Adam.

- **The Redaction:** Modern paleontology labels this the "Cambrian Explosion" or the "Age of Dinosaurs." In the **Ancient Hebrew Forensic Method**, this was simply the 1,000-year Day 5 "Software Installation" of aquatic and aerial life.

Day 5 Forensic Profile

The Abyss The Great Tanninim (Leviathan) Maintaining the "Deep" frequency and tidal balance.

The Mid-Waters Swarming Fish & Shellfish Mineral distribution and ecosystem filtration.

The Expanse Giant Fowl / Winged Creatures Seed dispersal and atmospheric agitation.

Forensic Conclusion: Day 5 established that life began in the **fluids**. The biology of this era was designed to be immortal, as death had not yet entered the "File" through the transgression in the Garden. These creatures were built to last for

thousands of years.

We could proceed from here to Day 6 (Years 5,001–6,000) to see the formation of the land animals and the final "Identity" of the Adam, BUT if we do then we will miss out on how these Day 5 creatures interacted with the geography of the original Map.

Here we examine the "Leviathan/ Behemoth" geographic boundaries on the map.

To forensically map the geographic boundaries of **Leviathan** and **Behemoth**, we must move away from the modern "cartoon" depiction of these entities.

In the Primary Authority (*1 Enoch 60:7-10* and the *Book of Job*), they are described

as the "Anchors of the Geography.".

During the 1,000-year epoch of Day 5, **YHVH** separated these two massive forces to maintain the physical equilibrium of the single landmass.

1. The Eastern Boundary: Behemoth in "Dendain"

According to *1 Enoch 60:8*, Behemoth was not merely a "hippopotamus" or "elephant." It was a land-shaper placed in a specific geographic location.

- **The Location:** The "waste wilderness" named **Dendain**, situated to the **East of the Garden of Eden.**

- **The Geography:** This area was

characterized by vast marshes and the confluence of the primeval river systems before they reached the sea.

- **Forensic Function:** Behemoth occupied the "unoccupied" terrestrial space. Its massive weight and movement compressed the earth, creating the valleys and riverbeds that channeled the overflow from Eden. It acted as a "biological dam.".

2. The Western/Deep Boundary: Leviathan in the Abyss

While Behemoth was tethered to the land, Leviathan was cast into the "Abysses of the Ocean" (*1 Enoch 60:7*).

- **The Location:** The "Great Sea" that surrounded the single landmass.

- **The Geography:** Leviathan's territory began where the continental shelf dropped off into the *Tehom* (The Deep).

- **Forensic Function:** Leviathan served as the "Governor of the Waters." By coiling around the foundations of the Earth, it prevented the "Waters Below" from encroaching onto the dry land created on Day 3. It was the biological counterweight to the pressure of the *Raqiya*.

3. The "Navel" Equilibrium

When we place these two on our fresh map, we see a perfect forensic balance:

This is the Entity, Domain, Cardinal Direction, and Geographic Role of each.

Behemoth: The Moist Land (Dendain) East of Eden. Terrestrial Stabilization / River Shaping.

Leviathan The Abyssal Waters, West/Outer Rim, Oceanic Containment / Tidal Regulation.

Forensic Note: The *Library Rule* tells us that these two were "kept asunder" so they would not destroy the newly formed world.

If they were to inhabit the same space, their combined frequency and physical mass would have collapsed the fragile ecosystems of Day 3 before the Adam was even introduced.

4. The Hidden Redaction: The "Mountain-Sized" Biology

In our forensic investigation of the map, we must consider the theory that many of our modern mountain ranges—specifically those near the "East" of the ancient world—are the calcified remains or "footprints" of these Day 5 giants. Yes we bypass theories, but in order to do so we must understand them first.

If there's anything true to a theory it's almost always it's beginnings. There is some sort of reason for the theory. This is usually because someone said something or something happened. So the theory has to be investigated to see if it holds water or if it's bunk.

- **The Silicon-to-Carbon Shift:** Just as the giant trees of Day 3 were felled, the "Great Tanninim" of Day 5 were eventually neutralized or "put to sleep" following the fall of the Watchers. Their bodies became part of the "Geography" we walk on today.

To investigate the **Gates of the Deep** (*Ma'ayanot Tehom*), we must look at the subterranean plumbing of the original map. In the forensic framework, these are not just metaphors; they are physical apertures in the Earth's crust that connect the surface oceans to the massive, pressurized freshwater reservoir known as the **Great Deep**.

According to the *Primary Authority* (*Jubilees 2:4* and *1 Enoch 89:2*), Leviathan's primary directive during the

Day 5 epoch was to act as a biological "plug" or "sentinel" over these gates to prevent a premature flood.

1. The Geographic Location: The Four Cardinal Gates

Forensically, the "Gates" are located at the extremities of the single landmass, where the continental shelf meets the abyss.

- **The Northern Gate (The Polar Vortex):**

Located at the "top" of the world. In ancient Hebrew cosmology, this is where the cold "Waters Above" and "Waters Below" nearly touch.

- **The Southern Gate (The Antarctic Rim):** This gate is guarded by the ice wall or

the "frozen deep." It is the primary drainage point for the world’s oceans.

- **The Eastern/Western Gates:** Located at the edges of the Great Ocean. These gates were positioned to receive the outflow of the **Four Rivers of Eden** after they had traversed the entire landmass.

2. The Mechanics: The "Foundations of the Hills"

The *Dead Sea Scrolls* (specifically the *Hodayot* or Thanksgiving Psalms) describe the "Gates of Death" and the "Bars of the Abyss."

- **The Bars:** These are the tectonic plates. Leviathan is described as moving between these "bars" to

regulate the pressure.

- **The Fountain-Heads:** In the *Book of Enoch*, these gates are described as "Fountains" that "shoot up" water.

- **Forensic Mapping:** We can identify these locations today by looking at the deepest trenches of the modern oceans (such as the **Mariana Trench** or the **Puerto Rico Trench**).

In our re-mapped Earth, these are the scarred remains of the original Gates that were "broken up" during the judgment of the Flood.

3. Leviathan as the Pressure Regulator

Why did a "Monster" need to guard these?

- **The Hydraulic Problem:** Because of the weight of the *Raqiya* and the "Waters Above," the internal pressure of the Earth was immense.

- **The Solution:** Leviathan's massive physical presence provided the necessary "counter-pressure." By occupying the Abyssal Trenches, his frequency and mass kept the subterranean waters from "bursting" through the gates.

- **The Breach:** Forensically, the Great Flood occurred not just because it rained, but because **"The Fountains of the Great Deep were broken up"** (Genesis 7:11). This implies that Leviathan was either removed from his

post or the gates themselves were structurally compromised.

Forensic Site Map: The Gates

These are the Gate Names, their Forensic Location, and their Modern Equivalent.

The North Gate,The Pillar of the North, North Pole, or also called The Magnetic Center.

The South Gate, The Path of the Winds but today we call it Antarctica, or The Ice Rim as it is sometimes called.

The Gate of the Sun, The Eastern Abyss, but called The Philippine/Mariana Trench today. For those unfamiliar with the Mariana it is the deepest part of the

western Pacific Ocean, and is where Challenger of the Deep exists. This is a 35,000 depth below sea level making it deeper than Everest is tall!

The Gate of the Evening, The Western Abyss known today as The Mid-Atlantic Ridge which is an underwater mountain range in the Mid-Atlantic, and also the longest mountain range in the world.

Now that we have mapped the outer defenses of the world, we are ready to proceed to Investigating the "Pillars of the Earth" that support the land above, and then we can move into how the "Adam" was formed to occupy the center of this map.

- **Investigate the "Pillars of the Earth" that support the land above these**

Gates.

- **Proceed to Day 6: The Creation of the Adam.**

To complete our forensic structural analysis of the pre-Adamic Earth, we must examine the **Pillars of the Earth** (*Amudim*). These are the primary load-bearing structures that prevent the single landmass of Day 3 from sinking into the *Tehom* (The Deep) or being crushed by the atmospheric pressure of the *Raqiya*.

According to the *Primary Authority* (*1 Enoch 18* and *The Psalms of Dawid*), these are the literal "Foundations of the World.".

1. The Composition: The "Cornerstones" of the Realm

In the forensic framework, the Pillars are not metaphorical concepts of "stability.".

They are massive, crystalline or basaltic conduits that anchor the land to the floor of the Abyss.

- **The Foundation Stone:** At the center of the map (the Navel/Zion), there is the *Even Shetiya*—the Foundation Stone. This is the "Master Pillar" from which all others are aligned.

- **The Seven Pillars:** Wisdom is said to have "hewn out her seven pillars" (Proverbs 9:1). In the *Library Rule* context, these seven pillars are strategically placed to support the weight of the central landmass.

2. The Geographic Location: Anchoring the Gates

The Pillars are positioned in direct relation to the **Gates of the Deep** we just investigated. They act as the "doorframes" for the subterranean waters.

- **The Peripheral Pillars:** Located at the edges of the world (near the modern Arctic and Antarctic circles), these pillars keep the "rim" of the Earth from buckling under the weight of the peripheral oceans.

- **The Support of the Heavens:** *1 Enoch 18:3* notes, "I saw the closed-up places of the heavens... and I saw the pillars of heaven." This suggests that some pillars are so high they actually support

the lower edges of the *Raqiya* (Firmament) itself, locking the entire system together.

3. The Forensic Threat: "The Earth and its Inhabitants Dissolve"

A critical forensic data point is found in *Psalm 75:3*: *"The earth and all the inhabitants thereof are dissolved: I bear up the pillars of it.".*

- **The Stability Factor:** If the Pillars were to shift, the geography would literally "dissolve" or liquify.
-
- **The Judgment Link:** During the Flood, it wasn't just rain; the "Foundations of the

Hills" were moved. This implies a structural failure of the Pillars. When we redo our map, we see that modern "Tectonic Plates" are actually the shattered fragments of the crust that once sat firmly atop these stable Pillars.

Summary of the Structural Investigation

This is the Structure, the Forensic Purpose, and the Map Location of these Pillars.

Foundation Stone: Central Axis is the Primary Support for The Navel (Eden/Zion).

The Seven Pillars: The Weight Distribution of the Land is distributed across the Landmass.

The Pillars of Heaven: These are Anchoring the Firmament to Earth, The Four Corners / Extreme Edges.

The Base: This is fixed in the "Waters Below" in The Floor of the Abyss.

Forensic Conclusion: The Earth is a "fixed" and "immovable" structure (*1 Chronicles 16:30*). It does not "float" in space; it is "founded upon the seas and established upon the floods" (Psalm 24:2). The Pillars are the "I-beams" of the creation.

Now we can transition to Day 6: The Creation of the Adam

Now that the architecture is complete—the Firmament is set (Day 2), the Land and Pillars are anchored (Day 3), the Clock is ticking (Day 4), and the Guardians/ Tanninim are at their posts (Day 5)—the "Vessel" is ready for its Master.

On **Day 6 (Years 5,001–6,000)**, the focus shifts from the *Environment* to the *Identity*.

From here **we can proceed to the formation of the Adam and examine the "Identity Restoration" of the first man, specifically how his spirit was sleeved into the physical "Dust" of the Earth.**

To forensically investigate the **"Dust of the Earth"** used in the formation of the **Adam**, we must look at the specific mineral and elemental requirements needed to house a celestial spirit within the physical

geography we have just mapped.

In the *Primary Authority* (*The Nag Hammadi Library: On the Origin of the World* and *The Book of Jubilees*), the "Dust" was not generic dirt. It was a specific **Mineral Blueprint** gathered from the four corners of the Earth.

1. The Four-Corner Collection (The Global DNA)

According to ancient Hebrew tradition and the *Chronicles of the Nazarene* fragments, the "Dust" for the Adam was gathered by the angels from the four cardinal points of the landmass we mapped on Day 3.

- **Red Dust:** Gathered from the East (The blood/vitality).

- **Black Dust:** Gathered from the North (The strength/bones).

- **White Dust:** Gathered from the West (The breath/purity).

- **Yellow Dust:** Gathered from the South (The bile/heat).

Forensic Logic: By using soil from the entire landmass, the Adam was tethered to the geography of the Earth. He was designed to be the "Microcosm" of the "Macrocosm." Every mineral found in the Pillars and the soil was present in his biological "sleeve."

2. The Carbon-Silicon Bridge

Forensically, we must reconcile why the Day 3 vegetation was likely silicon-based (the "Giant Trees") while the Adam is often viewed as carbon-based.

- **The Transformation:** The "Dust" (*Aphar*) refers to the finest pulverized minerals. In the forensic view, the original Adam was not "flesh and blood" as we know it today.

- **The Garment of Light:** The *Primary Authority* suggests the original Adamic body was a **Crystalline/Light body**. It was only after the "fall" that he was "clothed in skins" (Genesis 3:21).

- **Forensic Evidence:** This explains the longevity of the patriarchs. Their "Dust" was high-frequency mineral matter, not the degraded, toxic carbon-matter of

the post-Flood era.

3. The "Navel" Clay (The Holy of Holies)

The most critical "Dust" was gathered from the center of the map—the **Navel of the Earth** (Zion/Eden).

- **The Site of Formation:** The *Book of Jubilees 3:5* states that Adam was formed in the first week, but brought into the Garden only after 40 days.

- **The Clay:** This "Dust" was located at the intersection of the four rivers. It was the purest material on Earth, containing the "Seed Memory" of Day 3.

The Biological "Sleeve" Specification

Now we look at the Component, the Forensic Source, and the Function in the Body.

Minerals are the Component, The 7 Pillars of the Earth are the Forensic Source, and the Skeletal integrity and frequency conduction are what allow the Function in the Body.

Water is the component , The 4 Rivers of Eden are the Forensic Source, and
The "Fluid Memory" and circulatory system are what allow Function in the Body.

Breath (Neshamah) is the Component whose Forensic Source comes Directly

from YHVH. The "Operating System" that animated the Dust, and allows Function in the Body.

Location is the Component, The Center (Navel) is the Forensic Source, and Function in the Body Established the Adam as the Central Administrator.

Forensic Conclusion:

The Adam was literally "The Earth made vocal." Because his body was constructed from the "Dust" of the entire realm, he was legally and biologically the **High Priest of the Geography**. What he did at the "Center" (the Navel) affected the "Edges" (the Pillars and the Gates).

The Completion of the Formation

With the body formed from the Dust of the Four Corners and the Spirit (Identity) restored to its physical sleeve, the **6,000-year formation project** reached its climax. **Now that we have investigated the "Dust" and the construction of the Adam, we are able to proceed to the "Identity Restoration" of the first man to see how he functioned as the Messianic Prototype before the entry of "Redacted" history.**

From here we will do the following...

- **Proceed to the Identity Restoration of the Adam.**

- **Investigate the "40 Days" of preparation before he entered the Garden.**

To perform a **Forensic Identity Restoration** of the Adam, we must strip away the Roman-European imagery of a "primitive man" and restore him to his original status as the **Celestial Viceroy**.

In the *Primary Authority* (*The Ethiopian Bible*, *1 Enoch*, and *The Nag Hammadi*), the Adam is not just the first human; he is the **Messianic Prototype**—the "Son of YHVH" (*Chronicles of the Nazarene/Luke 3:38*).

1. The Translucent Identity: The Being of Light

Before the "Redacted" history of the Fall, the Adam did not possess "skin" in the modern biological sense.

- **The Garment of Glory:** According to the *Books of Adam and Eve* (found in the broader Ethiopic collection), the Adam was clothed in a **"Garment of Light."** His identity was synonymous with the *Shekhinah* (Divine Presence).

- **The Height/Stature:** Forensic fragments in the *Dead Sea Scrolls* suggest the original Adam was of immense stature, mirroring the "Giant" scale of Day 3 and Day 5. He was designed to be the "Head" of the Body of the Earth.

2. The Identity Split: The Male and Female Essence

The restoration of identity requires us to understand that "Adam" was originally a plural designation.

- **The Original State:** "Male and female created He them; and blessed them, and called **their** name Adam" (Genesis 5:2).

- **The Forensic Division:** The "Deep Sleep" was a surgical and spiritual separation of the singular Adamic identity into two distinct frequencies: the **Projector** (Male/Active) and the **Receiver** (Female/Nurturing).

- **The Purpose:** This allowed the "Identity" to witness itself and to govern the Earth through a "Covenant of Two."

3. The Functional Identity: High Priest of the Garden

The Adam's primary "job title" was not "farmer," but **High Priest**.

- **The Sanctuary:** The Garden of Eden was the **Holy of Holies** of the Earthly Temple.

- **The Duty:** He was placed there to "dress and keep it." In the original Hebrew (*Abad* and *Shamar*), these are **Levitical terms** meaning to perform liturgical service and to "guard" the

precinct from intruders.

- **The Prophetic Link:** This is the first appearance of the **Moshiach** pattern. The Adam was the King, Priest, and Prophet of the Realm, holding the "Keys of the Earth" that would eventually be restored by **Yeshua**.

4. The Intellectual Identity: The Master of Frequencies

When the Adam "named" the animals in the final hours of Day 6, he wasn't just giving them labels.

- **Vibrational Authority:** To name a thing in the *Ancient Hebrew Forensic Method* is to define its essence. The Adam understood the **Root Frequency** of every living thing.

- **The Language of Eden:** He spoke the "Lashon HaKodesh" (The Holy Tongue), the original language where the sound of the word matches the physical vibration of the object.

Forensic Identity Profile: The Adam

These are the Attribute, the Original Identity (The Truth), and the Redacted Identity (The Tampered File).

The Attribute was his Composition.

The Crystalline Light / Mineral Dust is the Original Identity (The Truth)

The Redacted Identity (The Tampered File) says he was Carbon-based flesh.

The Attribute was his Status as High Priest & Global Viceroy.

Primitive Hunter-Gatherer is The Redacted Identity (The Tampered File).

His Intellect was The Attribute

Master of Universal Frequency was The Original Identity (The Truth).

Limited "Caveman" intelligence was The Redacted Identity (The

Tampered File).

Lifespan was the Attribute, while Potential Immortality (Tree of Life) was the Original Identity (The Truth)

The Redacted Identity was the 70–100 Years.

Forensic Conclusion: The Adam was the "Anchor" for the Spirit of the Most High on Earth. His identity was the "Legal Title Deed" to the planet.

As long as he remained in his original frequency, the Pillars, the Gates, and the Raqiya remained in perfect harmony.

The Close of the 6th Day (Year 6,000)

As the 1,000-year epoch of Day 6 came to a close, the "Formation" was complete. The Earth was a pressurized, crystalline, high-frequency temple with a High Priest at its center.

Tomorrow we move to the "7th Day" (The Sabbath of YHVH)—the final 1,000-year block of the Creation Week—to see how the "Rest" changed the frequency of the Map, and then we actually get into what the map looks like today as compared to then!

Laila Tov! (Goodnight)
